

Geogrid Premium

GRASSFORM PRODUCT GUIDELINE

Temporary Roadways | Car Parks | Turf & Ground Reinforcement

Geogrid Premium

Geogrid - ideal for grassed areas and playgrounds

- » Can support up to 35 tonne axle loads
- » Geogrids are quick & easy to install, therefore reducing unnecessary on-site costs
- » Geogrids are sustainable, environmentally friendly & have low transport and handling costs
- » Suitable for both temporary or permanent ground reinforcement installations
- » Geogrids provide water dispersion and are SUDS compliant, providing an efficient drainage solution
- » Non expanding, dimensionally stable & can be cut-to-size

Geogrid Premium is the perfect solution for creating permeable pathways and attractive car parking areas.

Technical Specifications

Material:	100% Recyclable HDPE	
Dimensions:	19.69 ²	500mm ² (4 per sq m)
Thickness:	1.57"	40mm
Connection:	Interlocking male and female lugs	
Weight:	8.8lbs	4kg per sq m

Features

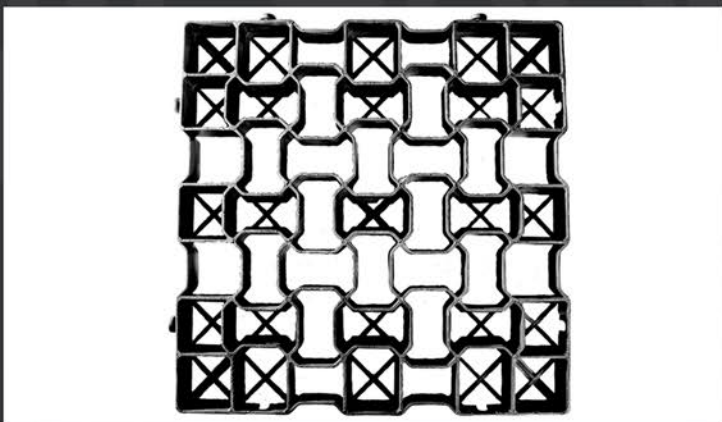

Geogrids are tough and flexible ground reinforcement for semi-permanent or permanent applications. They are strong enough to support up to 35 tonne axle loads and durable enough to survive the weather year round, even resisting the harshest of wears and tears. The versatile nature of the grids makes this product perfect for a wide range of uses.

Its lightweight design reduces handling and transportation costs, and the large interlocking tiles make Geogrids quick and easy to install over a large area, offering further cost efficiency. You can trust Geogrids to provide crack-proof, non-expanding dimensionally stable surfaces with natural drainage.

Advantages

Geogrid installations are aesthetically pleasing because a grass or decorative gravel infill can easily be added to transform any area where it has been installed.

They are also very versatile as they are suitable for multiple applications, including construction sites, access roads, commercial parking, private driveways, agricultural facilities, helicopter landing pads, embankment stabilisation areas, infiltration basins and more.
