# Trakmats

**Trakmats - the ultimate light / medium duty road mat**

- » Hand cut-outs for easy transport, lifting, installing and secure storage
- » Avoid expensive and heavy steel plates and bog mats
- » Avoid slippery, short term and unsafe plywood
- » Avoid oversold pedestrian plastic mats
- » Avoid costs of bogged down vehicles, property and environmental damage
- » Project a professional image to customers and avoid injuries by providing efficient and safe work conditions
- » Easy fit connectors for quick installation

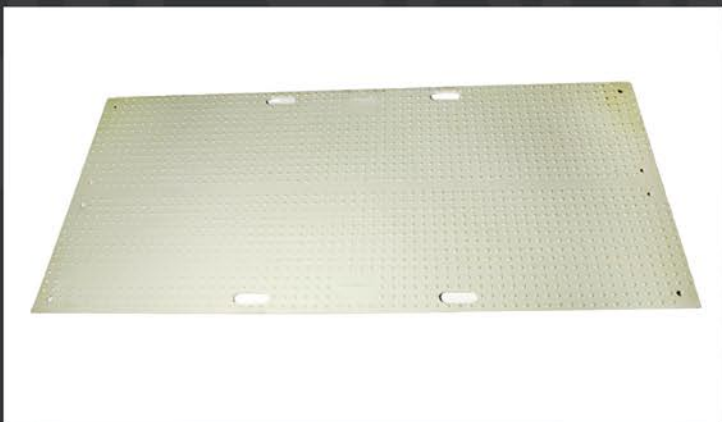

Internationally proven Trakmats deliver heavy duty temporary access for all weather and ground conditions.

- » Boat regattas
- » Caravan parks
- » Cemeteries
- » Landscaping
- » National parks
- » Infrastructure
- » Military Sites
- » Events

## Technical Specifications

<b>Material:</b>	100% recycled HDPE	
<b>Dimensions</b>		
<b>Length:</b>	7'11"	2410mm
<b>Width:</b>	3'11"	1200mm
<b>Depth:</b>	0.5"	12mm
<b>Weight:</b>	77lbs	35kg
<b>Surface Area:</b>	31.2ft <sup>2</sup>	2.9m <sup>2</sup>
<b>Transportation:</b>	650 x Trakmats per EU standard curtain sided 13.6m trailer	

\*Compression tested at National Physical Laboratory, UK.

## Features

One key aspect of the Trakmats that makes them suitable for use on sensitive grass areas is their colour: a light grey/green. This helps them to reflect heat and light, rather than absorb them as many other board systems do with their black colouring.

This enables our Trakmats to be used for effective ground protection in areas such as gardens, parks, golf courses and cemeteries. There are many different circumstances our boards can be applied to, particularly ground protection where vehicles have to cross.

## Self-Cleaning Grip Surface

Their unique self-cleaning grip surface is aimed at dispelling mud but will still give grip to vehicles or pedestrians as they cross the grass protection boards. The traction cylinder built into the underside of the boards also aid in gripping the surface, whether that be soil, grass or synthetic turf. These small cylinders prevent sliding and provide stability to the boards.
